Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 7-10, 12-14, 20-23, 25-27, and 30-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Iiyama et al. U.S. Patent Number 6,332,448. Iiyama et al. Iiyama discloses a fuel supply device, which supplies fuel in a main tank (8) to a vehicle engine (20), a fractional distiller (9) fractionates the fuel in the main tank (8) into a high-octane fuel component and a low octane fuel component, and stores these fuel components in subtanks (10, 11). The high-octane fuel component is supplied by a high-pressure intermittent pump (16), and the low octane fuel component is supplied by a variable pressure pump (15), to a fuel injector (17) of the engine (20). A controller (1) identifies a running region by the rotation speed and loads of the engine

Art Unit: 3747

(20), determines the proportion of fuel components supplied to the engine (20) according to the identified running region and controls a discharge pressure of the variable pressure pump (15) so that the determined proportion is achieved.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-6, 11, 15-19, 24, 28 and 29 rejected under 35 U.S.C. 103(a) as being unpatentable over Ilyama et al in view of Chan U.S. Patent Number 5,560,344.

5. Ilyama et al. applies as in claims 1, 14, and 27 failed to show the duel chamber single cased tank as claimed in application.

6. However, Chan discloses a duel tank system for different octane fuels having the different volumes and the tanks being integrally formed.

7. At the time of invention it would have been obvious to one of ordinary skill in the art to used the tank shown in Chan in the invention of Ilyama et al..

8. Motivation would have been to minimize space requirements by having a single tank.
